215 David and Lamaha Streets, Kitty,  
Georgetown, Guyana, SA.

### ABOUT ME

Electrical Engineer specializing in automation, embedded systems, energy efficiency, and full-stack development. Experience includes PLC programming, microcontrollers, PCB design, IoT systems with web-based monitoring and control systems. Currently working at SLB on facilities engineering projects involving electrical infrastructure design, AutoCAD site layouts, and compliance validation.

Enjoys mechatronics tinkering, and teaching STEM educational outreach related projects, alongside leadership roles in technical, creative, social outreach and personal development opportunities within the community. Currently pursuing a Masters Degree in AI.

### EDUCATION

#### University of Guyana

Master's Degree in Artificial Intelligence,  
Nov 2024 - Present

#### University of Guyana

Bachelor's Degree in Electrical Engineering  
Sept 2020 - Nov 2024

#### University of Guyana

Associate's Degree in Electrical Engineering  
Sept 2018 - Nov 2020

### CERTIFICATIONS / TRAININGS / COMPETENCIES

#### Certifications / Trainings

- NEST Safety Training (SLB)
- SIPP - Injury Prevention Programme (SLB)
- EV High Voltage Safety L2 (Legacy EV)
- Solar PV Installation Trainer (GTI)
- AI Foundataions (Avasant)
- Music Theory 1&2 (ABRSM)

#### Competencies

- Autodesk (AutoCAD/ Fusion360 / Revit)
- Circuit & Network Simulators
- PCB Design (Altium / EasyEDA / KiCad)
- MATLAB
- PLC & Control Systems
- 3D Modelling & Printing
- Full-Stack Development ( MERN )
- Embedded Systems (AVR , STM32, PIC )
- Microsoft Office Suite
- Adobe Creative Suite
- Game Development (Unity 3D, Unreal )
- Creative Media (Procreate / Clip Studio)

### PROFESSIONAL WORK EXPERIENCE

#### Facilities Project Engineer

SLB, Guyana Integrated Base | June 2026 - Present | Probation | Full-time

- Support facilities projects, maintenance, validation and compliance with international standards (NEC) in coordination with contractors
- Produce and revise site layouts and MEP (Mechanical, Electrical and Plumbing) daigrams using AutoCAD and Autodesk tools
- Leverage AI, automation and software engineering tools to enhacnce task managment systems to improve project delivery efficiency.

#### Instructor/Laboratory Technican (Electrical Engineering)

University of Guyana, Faculty of Engineering & Technology | Nov 2022 - Aug 2026 | Full-time

- Teach undergraduate lectures and tutorials in Math, Electrical Fundamentals, Multisim/MATLAB/Pspice and Mechatronics
- Instruct and supervise laboratory sessions in electronics, instrumentation, microcontrollers (Arduino), and PLC systems
- Guide student projects and maintain laboratory equipment and inventory.

#### Energy Auditor

OECS / World Bank/ RENEWTT / GEA | Mar 2025 - Jul 2025 | Part-time

- Conducted energy audits for 11 government buildings with the World Bank team across Guyana
- Produced architectural sketches and assessments focused on improving EEMs - Energy Efficiency Measures (lighting, HVAC, ventilation, building envelope)
- Installed and troubleshot wireless IOT monitoring systems on electrical panels for power consumption analysis

#### Junior Software Developer

Cenedex Software Solutions | Sept 2018 - Sept 2022 | Part - Time | Remote

- Built and deployed React Native apps (geolocation, geofencing, notifications, payments)
- Assisted development of PHP/Javascript web applications and e-commerce platforms
- Managed backend services and databases on CentOS7

#### CRM /Graphics & IT Assistant

ActionCOACH Guyana | Sept 2017 - Sept 2018 | Full Time

- Managed Soffront CRM systems, landing pages, email broadcast campaigns
- Produced and edited photo/video content for events and client social media
- Administered client social media accounts to drive engagement and visibility
